SPM - Sync. Protection/Control - Parts

This product is under [last-time buy](#). Orders may be placed until 31st December 2021, and will be fulfilled based upon availability. As an alternative, please consider the [869](#) with integrated SPM.

SPM Calibration Module for DCCT2

Part Number: 1740-0005T

SPM Control Card/VDN

Part Number: 1740-0006T

SPM DCCT-400

Part Number: X400-0006

SPM CASE

Part Number: 215B9188G1

SPM DCCT-200

Part Number: X400-0005

SPM Filter Board

Part Number: 1740-0002

The SPM controls starting, synchronizing, and protection of collector-ring or brushless type synchronous motors.

Harsh Environment Conformal Coating option.

Applications

- Collector-ring synchronous motors

Protection & Control

- Field application
- PF regulation maximizes efficiency
- Reluctance torque synchronizing
- Re-synchronizing
- DC field current loss
- DC field voltage check
- Incomplete sequence
- Field winding overtemperature
- Power factor (pull-out)
- Stall/acceleration
- Restart lockout
